101, Block 8, Type IV Qtrs, NUPPL Township, Ghatampur Tehsil, Kanpur Nagar Dt, Uttar Pradesh, India

PROFESSIONAL SUMMARY

MERN Stack Developer with hands-on experience in building scalable full-stack applications using React.js, Node.js, Express.js, and MongoDB. Skilled in developing RESTful APIs, implementing authentication, state management using Redux Toolkit, and creating responsive user interfaces. Strong understanding of clean architecture, code optimization, and maintainable application design.

SKILLS

- **Frontend:** React.js, Redux, JavaScript, HTML, CSS, Tailwind CSS, Formik
- **Backend:** Node.js, Express.js, MongoDB, Mongoose, Postman
- **Tools & Others:** Git, GitHub

PROJECTS

Todo Application – MERN Stack / Jan 2022 – Jun 2022

- Developed a full-stack Todo application with CRUD operations and RESTful APIs.
- Implemented Redux Toolkit for state management and Axios for optimized API communication.
- Created responsive UI using Tailwind CSS and Bootstrap with scalable backend architecture.

Goal Setter Application (MERN Stack) / Jan 2022 – Jun 2022

- Built a goal tracking application with secure authentication using JWT and bcrypt.
- Implemented CRUD operations and scalable RESTful APIs using Express.js.
- Managed application state with Redux Toolkit and ensured modular backend design.

E-Commerce Website (MERN Stack) / Jan 2022 – Jun 2022

- Developed a full-stack e-commerce web application using React, Node.js, Express.js, and MongoDB with complete product and cart management features.
- Implemented secure user authentication and authorization using JWT and bcrypt for protected routes and user data security.
- Integrated payment gateway functionality for seamless online transactions and order processing.
- Utilized Redux Toolkit and RTK Query for efficient global state management and optimized API handling.
- Designed responsive UI components with React Router and reusable architecture for scalability and maintainability.

Blog Application (MERN Stack) / Jan 2022 – Jun 2022

- Built a full-stack blog platform using React, Node.js, Express.js, and MongoDB with dynamic blog creation and management features.
- Implemented authentication and authorization using JWT and bcrypt to secure user accounts and protected routes.
- Added image upload functionality using Multer for managing blog images and media content efficiently.
- Developed RESTful APIs and structured MongoDB schemas for scalable data handling and content management.
- Created a responsive and user-friendly interface with React Router and reusable React components.

Expense Tracker Application (MERN Stack) / Jan 2022 – Jun 2022

- Developed a full-stack Expense Tracker application using React, Node.js, Express.js, and MongoDB for managing daily income and expenses.
- Implemented secure authentication and authorization using JWT and bcrypt to protect financial data and user accounts.
- Built RESTful APIs for transaction management, expense tracking, and data handling with MongoDB and Mongoose.
- Utilized Redux Toolkit and Axios for efficient state management and seamless API communication.
- Designed a responsive and intuitive UI to improve user experience across desktop and mobile devices.

EDUCATION

MCA – Master of Computer Applications

Annamalai University, Chidambaram | 2019

BCA – Computer Applications

Bharathidasan University | 2009

CERTIFICATIONS

- Full Stack Developer Program – GUVI Geek Networks

LANGUAGES

English, Tamil
